## SINAX HAVALANDIRMA SİSTEMLERİ

Günümüzde yaygınlık kazanmış olan yalıtımı maksimum düzeydeki PVC pencereler, dış mekânlarla evin veya herhangi bir iş yerinin iç mekânını hemen hemen 'O'a yakın derecede 'ayırmaktalar'. Dolayısıyla, mevcut kanallardan ev içine giren temiz hava yetersiz kalmakta ve iç mekânlardaki hava bozulmaktadır. Böylece, yeterli havalandırma koşulları sağlanamamaktadır. Neticesi ise bellidir: insanlarda baş ağrısı ve temiz hava eksikliğinden doğan benzeri rahatsızlıklar, ev içinde ise havasızlık, kötü kokular, yüksek rutubet, kışın ise duvarlar ve camlarda mantar oluşturabilecek derecedeki ıslanmalar.

SINAX HAVALANDIRMA SİSTEMLERİ sade ve kullanışlı olmalarıyla birlikte minimum masraflarla mekânlarda sağlık, konfor ve rahatlık yaratmaktadır.

SINAX HAVALANDIRMA SİSTEMLERİ iç mekânları havalandırmakla beraber, PVC pencerelerde sıkça görülen nem, duvarlarda mantar, küf, kötü kokular gibi problemleri en etkili şekilde çözebilmektedir. Pencerelerin üst kısmına rahatça monte edilebilen SINAX HAVALANDIRMA SİSTEMLERİ temiz havanın konforlu şekilde iç mekânlara girişini sağlamakta, bununla birlikte ne cereyan nede ses kirliliği yaratmaktadır.

SINAX HAVALANDIRMA SİSTEMLERİ'nin artıları:  
Temiz hava mekânlara girmekte ve saatte insan vücudunun ihtiyacı olan 30 m<sup>3</sup>'e kadar hava değişikliği sağlanmaktadır. Cereyan oluşmaz, nem, mantarlaşıma, küflenme önlenir. Rahat bir şekilde temiz hava dolaşımının ayarlanmasını sağlar. Evin ısı yalıtımını bozmaz. Evin ses yalıtımını bozmaz. Elektrik ihtiyacı yoktur. Yeni veya yapılmış pencerelere rahatça takılabilir. Montaj şekli sade ve özel teknik bilgi gerektirmez. Pencerelerin cam kısmı hasar görmez. Estetik ve göze çarpmayacak kadar küçüktür.

SINAX HAVALANDIRMA SİSTEMLERİ montajı her türlü PVC, alüminyum veya ahşap pencerelere takılabilmektedir. Pencerelerin üst kısımlarında uygun büyüklüklerde deliklerin açılması yeterlidir. Sonra sadece ürünü pencereye vidalamak kalmaktadır. Montajı hem kapı pencere atölyelerinde hem de takılmış kapı-pencerelerde rahatlıkla, pencereler çıkarılmadan ve camlar değişmeden yapılabilmektedir.

## SINAX VENTILATION SYSTEMS

In most buildings nowadays, window isolation is maximized to its highest levels. This leads to low fresh-air circulation, which pollutes the in-house environment.

Consequences are headaches, diseases caused by lack of fresh air, bad smells, humidity , especially causing fungus on the interior walls.

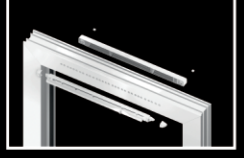

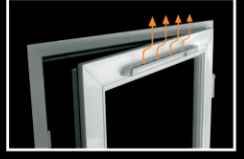

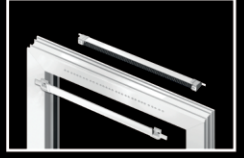

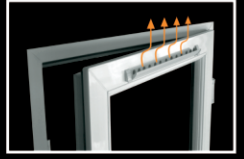

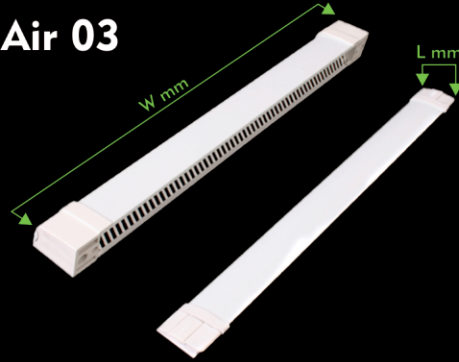

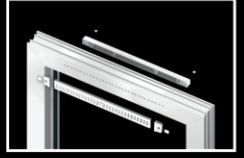

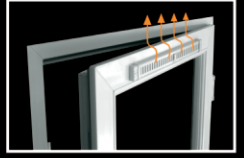

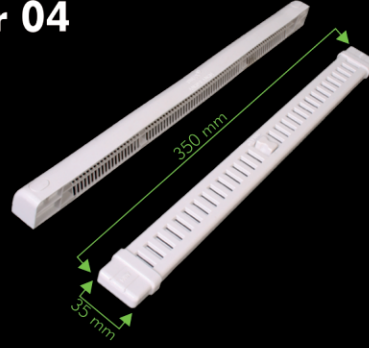

SINAX VENTILATION SYSTEMS are user friendly enable a healthy and comfortable ambiance together with minimized energy consumption.

SINAX VENTILATION SYSTEMS both ventilate indoor and solves the problems arising from a low air quality, corrosion on windows due to moisture, bad smells.

The advantages of SINAX VENTILATION SYSTEMS are,  
Enable fresh air to get in.  
Supply air charge up to 30 m<sup>3</sup>/h Prevents sudden changes in temperature and humidity preventing fungus & corrosion Solve lack of air problem for indoor environment.  
Stabilize clean air circulation problem. Comply with energy saving requirements.  
Do not need electricity  
Easy to install and compatibale with almost all windows  
Aesthetic, fit to size

Installation of SINAX VENTILATION SYSTEMS is easy to apply and train. Most of the systems are installed by making holes on windows frames/sashes. There is no need to dismount window and user only needs to fix on windows.
